

AMK SERIES

SAFETY GUN-LOCKS

- When a police weapon is not in use it is necessary to protect it safely, blocking access to it by unauthorized people, and avoiding risk of accidents. At the same time, the police agent must have fast access to the weapon in a convenient and safe manner. The range of Federal Signal Vama AMK Gun-locks gives the solution to both needs.
- AMK Series Gun-locks are composed of a fixed body and a locking cover. The weapon is lodged in a cavity between the body and cover.
 - Gun-locks of adjustable cavity are made in steel, have a mobile bridge that adjusts the cavity and allow a wide range of weapons.
 - Gun-locks of fixed cavity are made in aluminium and have a predetermined internal dimensions.

AMK Series Gun-locks offer the following characteristics and options:

- Opening / Locking
 - Manual
 - Electromagnetic
 - Manual-electromagnetic
- Unlocking:
 - Manual
 - Electromagnetic
 - Electromagnetic with timer
 - Manual-electromagnetic
- Blocking:
 - Manual
 - Automatic
- Cavity:
 - Adjustable
 - Fixed
- Installation:
 - Vehicles, police stations, armouries...

Gun-lock installed in the vehicle

AMK SERIES SAFETY GUN-LOCKS

AMK-50 Ref.#1204001

- Electromagnetic opening (push button/lateral pivot)
- Electromagnetic unblocking (push button/lateral pivot)
- Electromagnetic unblocking with timer (unblocks the gun-lock during 7 seconds)
- Manual (front button) and electromagnetic locking
- Manual blocking (front button)
- Adjustable cavity (58x43-78 mm)
- External dimensions (70-105x103x146 mm)
- Steel material. Weight: 1.5 kgs
- 12V model

AMK-60 Ref.#1204020

- Manual opening (key/lateral pivot)
- Manual unblocking (lateral pivot)
- Manual locking (key)
- Manual blocking (key)
- Adjustable cavity (58x43-78 mm)
- External dimensions (70-105x103x146 mm)
- Steel material
- Weight: 1.4 kgs

AMK-90 Ref.#1204008

- Electromagnetic opening (push button)
- Electromagnetic unblocking (push button)
- Electromagnetic unblocking with timer (unblocks the gun-lock during 7 seconds)
- Electromagnetic locking
- Automatic blocking (when the gun-lock is closed)
- Fixed cavity (47x70 mm)
- External dimensions (109x68x91 mm)
- Aluminium material
- Weight: 0.7 kgs
- 12V model

AMK-100 Ref.#1204006

- Manual/electromagnetic opening (key/push button)
- Manual/electromagnetic unblocking (key/push button)
- Electromagnetic unblocking with timer (unblocks the gun-lock during 7 seconds)
- Electromagnetic and manual (key) locking
- Automatic blocking (when the gun-lock is closed)
- Fixed cavity (47x70mm)
- External dimensions (106x75x89 mm)
- Aluminium material. Weight: 0.8 kgs
- 12V model

AMK-150 Ref.#1204023

- Manual/electromagnetic opening (key/push button)
- Manual/electromagnetic unblocking (key/push button)
- Electromagnetic unblocking with timer (unblocks the gun-lock during 7 seconds)
- Electromagnetic and manual (key) locking
- Automatic blocking (when the gun-lock is closed)
- Fixed cavity (29x56 mm)
- External dimensions (106x75x89 mm)
- Aluminium material
- Weight: 0.9 kgs
- 12V model
